

STATE OF HEALTH IN THE EU

Pooling expertise, strengthening knowledge

Deliverables of the **knowledge cycle**, in support of EU Member States

Making the case for smarter investing in health:

highlights of "Health at a Glance: Europe 2018"

Health spending accounts for 9.6% of GDP

Low income households have 5 times higher unmet care needs than high income

Up to one-fifth of health spending is inefficient and could be used for other care needs

Unnecessary admissions consume over **37 million hospital bed days** each year

1 in 6 people has a mental health issue

Direct and indirect costs adding up to more than **4% of the GDP** (over EUR 600 billion)

PREVENTION REMAINS A PRIORITY

MORE THAN 790 000 DEATHS PER YEAR DUE TO BEHAVIOURAL RISK FACTORS

20%
ADULT EU
CITIZENS
ARE SMOKERS

38%
ADOLESCENTS
REPORTED
BINGE-DRINKING

1 IN 6
ADULT EU
CITIZENS
ARE OBESE
